Company information:

Launched into the market just five years ago, bMAC produces the preferred scissors of international hairstylists. bMAC scissors are high-quality, superior-designed Japanese scissors. □bMAC worked very hard, without parading useless years of activity under the aegis – most of the time counterfeit – of the Japanese flag. Our production, verifiable at any time, is in Niigata, Japan. We did not emigrate to countries where the unskilled labour is cheap and almost void of quality. We have worked very hard in our own native country, with our valuable steels. Every single bMAC scissor is entirely handmade and it is cuddled like a baby. We are proud of it. And, without false modesty, we are very satisfied with the reply of the worldwide market, which has recognised in bMAC the best and most prestigious scissors collection all over the world. □We will wait for you in our small – but warm for the emotions we will give you – stand G264. There, you will find our representatives for all Europe: thanks to their knowledge and kindness, you will get involved in an sensory journey, made of scissors, men and quality. □We are also looking for exclusive distributors for European countries.
