Contact name: Stanley Levy

Address: 247 Mile End Road, London, E1 4BJ

Contact telephone number: 0207 7904 567

Email address: hair@hair-development.com

Company information:

VOLUMEXTRA a hand made integration unit through which customers own hair is blended! Cool and breathable for extra volume and length and ideal for finishing off a head of extensions. Thinning hair can be parted naturally via a skin like monofilament area. Three alternative methods of attachment; NUVOLUTION European hair blended with man made heat resistant hair consisting of a full head of clip on 20 inch long extensions which can be curled with hot tongs and keep its curl even after washing. □ Miracle Graft Hair Replacement (MGHR) is a skin like membrane into which single hairs are implanted one at a time representing growing hair. It is virtually undetectable by sight or touch in order to blend with customers hair. Great for replacing scars or alopecia or male pattern baldness.
