Company information:

Souglow is a professional styling series sold by the modern, innovative hairdresser who also focuses on the customer's health. Souglow is marked with the Nordic Eco-label and can be found on the so-called "positive list".□□

We emphasize quality and for a number of years we have been working on developing the Souglow concept with the primary purpose of being able to offer the best eco-labelled shampoo for professional use.□□

The Souglow shampoo and conditioner protect both colour-treated and natural hair against uv radiation. Our products contain several good oils and guar beans so therefore leaves your hair extremely soft and shiny.□□

This means that mum can now safely buy a shampoo for her colour-treated hair and let the children use it as well. We offer a nice bottle of 1000 ml for the whole family.□□

Souglow leaves your hair extremely soft and shiny. The products are for all types of hair – for fine hair to avoid limp locks, for thick frizzy hair to nourish and soften it.□□

You can also use the shampoo on your body. And another good idea is to use the conditioner when shaving your legs.□□

Souglow hair wax which is of course also marked with the Nordic Eco-label and AA asthma and allergi federal wick means we are on the so called positive list. There are two different types of wax: strong hold and extra hold.□

It is our mission to spread the message that we must take care of ourselves and especially the young people who use lots of wax every day. Research has shown that the use of wax can be traced in your blood already 2 minutes after applying it to your hair.□□

Souglow Wax does not contain any hormone disrupting chemicals – so there are no parabens,

no colour and no perfume. Soulglow lets your skin breathe.□□

And Soulglow wax lasts the whole day! It is easy to apply and rinse out and lets you re-style your hair during the day. □□

We believe Soulglow hair wax is the best in the world!

*MAKE YOU SOULGLOW*
